Hi Nick

Just rcvd your msg. As the vessel will be arriving on fumes we have no choice but to bunker her at Vancouver prior to proceeding to Plumper Sound. Not my preference but the vessel has been getting beat up by weather and consuming more MGO than expected.

Rgds,

Matt

Good afternoon Matt,

We have been advise that the CSL Thames will be taking bunkers at Vancouver.
What is your plan for supply, prior to or after discharging at Plumper Sound?

Best Regards,
Nick Schmied

Hi Nick,

Petrobulk has a confirmed stem for the M/V CSL Thames.

190 MT MGO

Please advise current ETA to Vancouver for bunkers.

Best Regards,
